

cmd_key™
Keyboard for MA3
 Programmed for MA3 Control Systems

SKU: cmdkeyma3v1

The **cmd_key** for MA3 from High Output is an 88 key keyboard that is programmed and ready to take with you on your next MA3 programming gig. With a near identical layout to current grandMA3 Family Consoles from MA Lighting, the **cmd_key** allows users to easily switch from full-sized desks to portable or secondary ones, without having to re-learn the mapping of the keys. With “silent” Cherry MX Black keys that are mounted on a steel frame in a small form factor, the **cmd_key** give users a tool for when they do not have the space or the need for a full-sized console but still want to maintain the professionalism and productivity of having a full desk. The keyboard utilizes a splash of color to allow users to quickly determine which section they are looking for when muscle memory fails. With a built in two port USB hub, you can connect a mouse or external keyboard

Features

- 88 pre-mapped keys for grandMA3 control systems by MA Lighting*
- Familiar keyboard layout to the current MA3 line of consoles.
- Industrial grade Cherry MX Black key switches result in a fluid and silent programming experience
- Sturdy construction built around a steel key frame for reliability and durability
